# Street View System & Solution

# City8 INFINITY Your Vision

# Introduction:

From the very beginning of 3D panorama period, City8 capturing car has brought the world first 360° street view to people. Now we are trying to make our most professional, most experienced and daring innovation assistance teams offer you our best service.

## Establish understanding

--------It is an easy but important step for realizing what can be achieved by City8 Street View System & Solution and what it can be applied for?

Street View is a technology featured in combination of 2Dmaps, 3Dmaps and 360°panoramic images that provides panoramic views omni-directionally along the streets in the world. It creates a new way to explore the world and can be used for personal and business aims.

Born in 2005, street view technology has made great progress and been applied in many fields, which helps produce interactive contents for mapping and location-based services, city planning, tourism, military scouting, safety and security, search and rescue operations.

Today, more and more agents, companies and related industries choose street view technology, which provides them a new, efficient way to do their research and achieve the goal. Street view definitely will be a trend in exploring every corner of the world.
